

Press Release

Cartonplast Ibérica continues betting on Sustainability

Dietzenbach, June 10, 2022: As of today, Cartonplast Ibérica has completed the installation of 300 photovoltaic panels at its plant in Parla (Madrid), beginning to generate electricity in a Sustainable way.

With this investment, subsidized by the Community of Madrid, Cartonplast will generate around 230,000 KW annually, covering around 20% of the electrical energy needs of the plant.

With this initiative, the Parla plant (Madrid) becomes the first factory of the Group at a global level that develops the generation of photovoltaic energy through solar panels; having planned the development of a similar project at its Poolplaca plant (Figueira da Foz – Portugal) in the coming months.

This photovoltaic installation project is integrated into the set of measures that Cartonplast Group is carrying out globally, in order to provide the best service for our customers, reducing the Carbon Footprint and the environmental impact of the business.

About the Cartonplast Group

CPL was founded in 1985, and its Headquarters is based in Dietzenbach, Germany. The PLPs by CPL are utilised at more than 130 production locations in 20 countries for the transportation of glass, cans and PET containers to filling plants. As the largest European Pool System operator of reusable PLPs on a rental basis, CPL has a closely linked network of service centres. As the pioneers of a “green” business model, CPL has more than 30 years’ experience in the delivery and collection, sorting and cleaning as well as in the management of reusable transport products. This environmentally friendly closed loop-pooling concept is one of the most successful outsourcing systems in Europe, with 7,300 participating fillers in the beverage, food, pharmaceutical and cosmetic industries in 30 countries. 45 million PLPs, currently in operation with more than 140 million cycles per year, are managed worldwide in 16 CPL Service Centres.
